Test of Nonverbal Intelligence – 4th Edition (TONI-4)

06/02/2014 - allows for both a collective reading, where the children as a group ate a single pizza, and a distributive reading, where each of the children ate a pizza (presumably a different one!) One way of dealing with such ambiguities in practice is to treat plural NPs as ambiguous between a collection-denoting reading and an “each member of the collection” reading. For example

Managed Care: What Went Wrong? Can It Be Fixed? | Stanford

01/11/1999 - People must have some reason for forgoing the diagnostic test they might want but which the doctor feels is of doubtful value. Fourth, we need to move from all-inclusive networks to including some very selective networks in the menu. I am thinking of Med Center's Health Plan or Kelsey Seybold and its main insurance partner, in which people

Computational Linguistics (Stanford Encyclopedia of

30/11/2018 - In the early 1980s Robert Axelrod held a tournament to empirically test which among a collection of strategies for playing iterations of the prisoner's dilemma performed best in a round-robin competition. The winner was a simple reciprocal altruism strategy called tit-for-tat (Rapoport & Chammah 1965), which simply starts off each game cooperating then, on each successive …

Bounded Rationality (Stanford Encyclopedia of Philosophy)

The Wechsler Memory Scale (WMS) is a neuropsychological test designed to measure different memory functions in a person. Anyone ages 16 to 90 is eligible to take this test. The current version is the fourth edition (WMS-IV) which was published in 2009 and which was designed to be used with the WAIS-IV. A person's performance is reported as five Index Scores: Auditory Memory, …
